Contents Vol. 124

Typology and single grain U/Pb ages of detrital zircons from Proterozoic sandstones in the SW Urals (Russia): early time marks at the eastern margin of Baltica
A.P. Willner, S. Sindern, R. Metzger, T. Ermolaeva, U. Kramm, V. Puchkov and A. Kronz 1
Nature of the crust below the Southern Granulite Terrain (SGT) of Peninsular India across the Bavali shear zone based on analysis of gravity data
M. Radha Krishna, P.J. Kurian, C.G. Nambiar and B.V.S. Murty 21
Petrology and geochemistry of metaigneous rocks from a Grenvillian basement fragment in the Maya block: the Guichicovi complex, Oaxaca, southern Mexico
B. Weber and L. Hecht 41
Systematic variations in C, O, and Sr isotopes and elemental concentrations in Neoproterozoic carbonates in Namibia: implications for a glacial to interglacial transition
H. Yoshioka, Y. Asahara, B. Tojo and S.-i. Kawakami 69
Structural evolution of the Neoproterozoic Western Allaqi–Heiani suture, southeastern Egypt
M.G. Abdelsalam, M.M. Abdeen, H.M. Dowaidar, R.J. Stern and A.A. Abdelghaffar..... 87

Special Issue
Origin and Evolution of Precambrian Anorogenic Magmatism

Preface 105

Derivation of the 1.0–0.9 Ga ferro-potassic A-type granitoids of southern Norway by extreme differentiation from basic magmas
J. Vander Auwera, M. Bogaerts, J.-P. Liégeois, D. Demaiffe, E. Wilmart, O. Bolle and J.C. Duchesne 107
Petrology and geochemistry of the Lyngdal granodiorite (Southern Norway) and the role of fractional crystallisation in the genesis of Proterozoic ferro-potassic A-type granites
M. Bogaerts, B. Scaillet, J.-P. Liégeois and J. Vander Auwera 149
Petrogenesis of jotunitic and acidic members of an AMC suite (Rogaland anorthosite province, SW Norway): a Sr and Nd isotopic assessment
O. Bolle, D. Demaiffe and J.-C. Duchesne..... 185
Relations between 1.19–1.13 Ga continental magmatism, sedimentation and metamorphism, Sveconorwegian province, S Norway
B. Bingen, Ø. Nordgulen, E.M.O. Sigmond, R. Tucker, J. Mansfeld and K. Högdahl..... 215
Petrogenesis of the Red Mountain pluton, Laramie anorthosite complex, Wyoming: implications for the origin of A-type granite
I. Carl Anderson, Carol D. Frost and B. Ronald Frost 243
Geochronologic, geochemical and isotopic constraints on the origin of monzonitic and related rocks in the Laramie anorthosite complex, Wyoming, USA
J.S. Scoates and K.R. Chamberlain..... 269
Ferro-potassic A-type granites and related rocks in NE Poland and S Lithuania: west of the East European Craton
G. Skridlaite, J. Wiszniewska and J.-C. Duchesne..... 305

doi:10.1016/S0301-9268(03)00157-8

Fractionation of metaluminous A-type granites: an experimental study of the Wangrah Suite, Lachlan Fold Belt, Australia
K. Klimm, F. Holtz, W. Johannes and P.L. King. 327

Contents Volume 124 343
